Calculate our carbon footprint

One website that could be suitable for 8 to 12-year-old students to learn about and calculate their carbon footprint is the "Kids Against Climate Change" website:

<https://www.kidsagainstclimatechange.com/carbon-calculator>

This website offers a simple carbon footprint calculator specifically designed for children to use. The calculator is user-friendly, with a colorful and engaging interface that asks questions related to a child's daily life, such as how they travel to school, what types of food they eat, and how they use electricity. After completing the calculator, the child will receive their carbon footprint score and be able to see how their lifestyle choices contribute to their carbon emissions.

The website also offers tips and resources for children to reduce their carbon footprint, as well as educational materials about climate change and its impacts. Overall, this website provides an excellent resource for children to learn about environmental issues and take action to reduce their impact on the planet.
